

# Notification of visit restrictions

Due to the wide spread of novel coronavirus infection, **we would like to ask everyone, including family members, not to visit any inpatients for a while.**

Even family members with a visiting request from us, for explanation of disease presentation or other reasons, cannot visit the patient if they have the following conditions.

- Body temperature 37.5°C or over
- Symptoms of cough, runny nose, sneeze and sore throat
- Within 14 days after entering Japan or returning from abroad

We appreciate your understanding and cooperation.
